INSTRUCTOR-LED TRAINING SOLUTIONS

Skills pay the bills, and workers who pursue continuing education often find they benefit from increased productivity — and often higher salaries, too. Employers benefit from a more effective workforce. It's win-win.

Remote learning tools have made gaining knowledge faster, cheaper and more convenient than ever. Capitalizing on the cost, travel and time savings possible through remote learning, while also designing a training program to maximize interactivity and in-depth instruction, Alphanumeric offers both live and virtual instructor-led training solutions to help employeess master business-critical skills with a convenient and cost-effective learning program, tailored to your business needs.

Instructor-Led Training

Reap the benefits of depth and flexibility that come from learning in a classroom setting. Augment an e-Learning delivery with traditional training for improved retention.

Virtual Instructor-Led Training (VILT)

Competent instructors lead virtual classes remotely, via interactive online meeting platforms, with webinars, podcasts, etc. as a complement. This enables greater flexibility and efficiency than classroom training permits.

Key Benefits

- Balance interactivity, convenience, flexibility, and cost in a tailored learning program
- Ensure participation and information retention with in-depth, interactive training
- Leverage the expertise of trained instructors
- Tailor learning initiatives to the unique requirements of your business, including custom curricula
- Deliver a best-fit training program utilizing industry-leading online tools and qualified instructors
