

NETWORK SECURITY

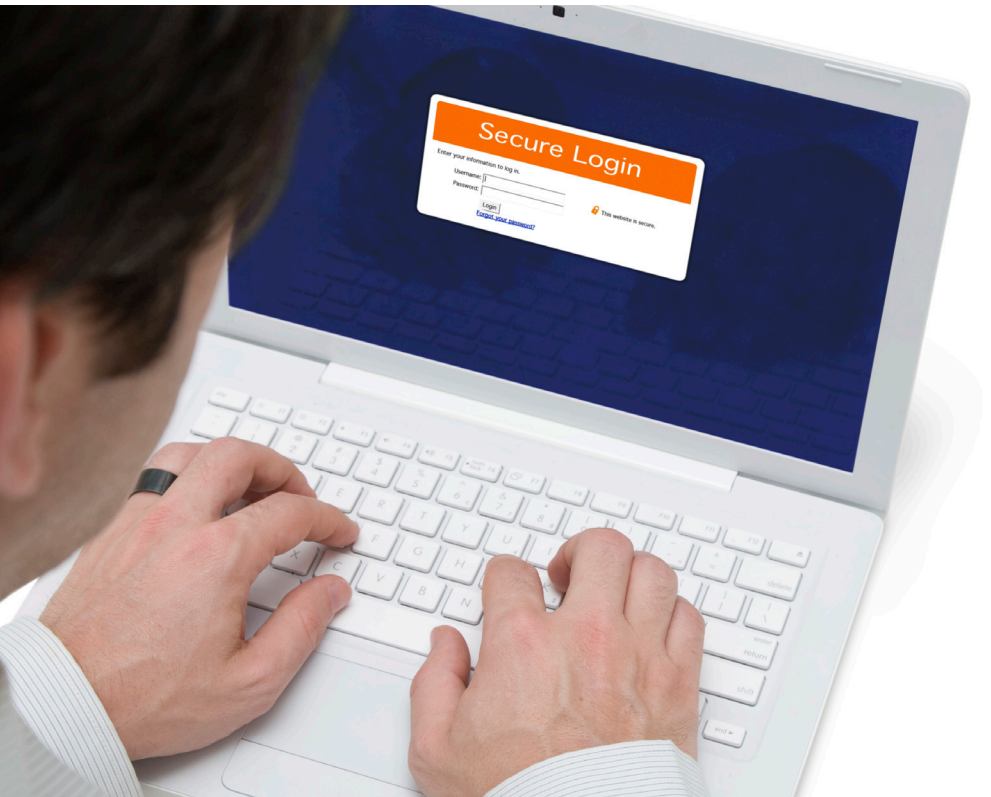

**THE BEST OFFENSE...**

# BUILD A PROACTIVE DEFENSE TO

**Consistently ranked among the top IT concerns, security's importance can hardly be overstated. With threats both accidental and malicious threatening sensitive data, business is dependent upon its proactive defenses.**

**A**lphanumeric's approach to network security is a multi-faceted suite of complementary solutions designed to minimize risk, and enhance effective response in the event of a breach or disruption. With a full-range of ongoing services and infrastructure implementations available to augment your security measures, Alphanumeric can work with you to determine, implement, and support the best network security solutions for your needs, and your budget.

# PROTECT YOUR ENVIRONMENT

## OUR STRATEGY

### Monitoring and Management

- ✓ Highly qualified AlphaCare technicians monitor and maintain your environment, 24x7, eliminating attacks as they occur, and ensuring your network is protected with the most up-to-date patches and upgrades.

### Anti-Virus / Anti-Spam / Anti-Malware

- ✓ Numerous software and hardware products are available to assist your efforts in filtering incoming messages, preventing virus and malware attacks before they happen, and eliminating threats that do find their way into your network.

### Patch Management

- ✓ Software vendors frequently issue product updates and patches that block all known vulnerabilities within a product, preventing intrusion. Alphanumeric can manage the upkeep of these patches to reduce the time you spend on maintenance, and allowing you to focus on long-term business goals.

### Disaster Recovery & Business Continuity

- ✓ Develop a strategic backup and continuity plan to ensure your business recovers swiftly from any interruption, with swift and thorough data recovery.

### Virtualization

- ✓ Leverage desktop virtualization to standardize and manage end-users' desktop images from the datacenter, effectively preventing end-user error or misuse, and the security issues they can create.
