

QUICK REFERENCE GUIDE

TECHNICAL PROFESSIONAL COURSES

Technical Professional courses included in Alphanumeric's off-the-shelf learning solution are designed to empower end-users with the technical knowledge base they need to succeed in a technology-driven workplace.

The Technical Professional course catalog enables users to maximize their skills, and managers to ensure the proficiency of their workforce, with an array of topics leading to technical competency or key technical certifications.

Pricing starts at only \$199 per user. This includes a one-year license to access the LMS and the entire suite of Technical Professional courses.

OFF-THE-SHELF TRAINING COURSES

Designed to enable managers to easily assign, deliver, measure, and report key knowledge transfer initiatives efficiently and effectively, these courses are delivered instantly to end-users through a hosted learning management system (LMS). This system enables self-directed training on the skills, policies, and procedures you need your employees to master. Participation and progress is automatically measured and reported, so you can be sure your people receive — and retain — the information presented.

Courses address a number of topics, including Health & Safety, Business Professional, Technical Professional, and Human Resources.
